## **EXAMINER'S AMENDMENT AND STATEMENT OF REASONS FOR ALLOWANCE**

### ***Examiner's amendment***

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with George E. Oram, Jr. on April 30, 2004.

The application has been amended as follows:

In the specification:

✓ On line 1 of claims 6, 7 and 8, please delete "or" (claims 1 or 2) and insert --and--

### ***Reasons for Allowance***

2. The following is an examiner's statement of reasons for allowance:

None of the references discloses alone or in combination a rectangular response optical filter partitioning a limited spectral interval in a light flux with wide spectrum including a converging focusing optical system placed between the grating and the reflector and a reflector disposed in the focal plane of the focusing optical system which has a dimension limited in the dispersion plane, wherein the position and the limited dimension of the reflector in the dispersion plane determine the partitioned spectral interval, in combination with the remaining claimed limitations.

The most relevant references, Martin et al. (U.S. Patent 6,249,364 and U.S. Patent 6,330,090), Graindorge et al. (U.S. Patent 6,507,597 and 6,529,327) and Lefevre et al. (U.S. Patent 5,594,744) disclose a Littman-Metcalf configuration. However, there are no disclosures in the documents cited disclose or suggest the structural and functional features as the claimed limitations above.

Claims 1-19 are therefore allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
